

Innovative PM components

Headbox systems *PAMA head*

**Rectifier
roll-type headbox**

- Highly beaten paper
- Good formation at low volume flows

Benchmarking

Advantages of PAMA component

- **Adjustment cinematic with proven elements**
 - Hinge joint to guarantee stability and tightness
 - Biaxial adjustment of nozzle geometry
- **Compensation of thermal extensions solved by design**
 - Straightness of headbox nozzle at all operating modes
 - No heat exchange circulation required
- **Adaption to the range of grades and to the capacity**
 - Variable prediffuser geometry for the control of the CD profile at edge zone
 - Exchangeable prediffuser insert
- **Corrosion resistance**
 - Made of high quality stainless steel
- **Easy to clean and operate**
 - Fully hinged back wall
